

Tailor-made training for the ITA community

The ITA-CET Committee and ITACET Foundation were created to promote education and training in tunnelling and underground space use. The primary role of the ITA-CET Committee is to develop pedagogical material, whilst the ITACET Foundation's mission is to organise and help fund educational events.

What we offer:

Training sessions/seminars - we work in close collaboration with ITA Member Nations and industry to co-organise tailor-made training, providing knowledge of best practices on a wide variety of topics.

Master courses - we can assist ITA Member Nations in setting up Master courses in the field of tunnelling and underground space.

Scholarships - we grant scholarships to students who wish to follow ITA endorsed Masters courses in tunnelling.

University network - a network to exchange ideas and improve communication between higher education institutions.
