

## **WG 12 – SPRAYED CONCRETE USE**

**Animateur**

**Eivind Grøv**

**Vice-animateur**

**Stefan Bernard**

**Tutor**

**Tom Melbye**

## Meeting on Sunday afternoon

33 participants from 17 member nations;  
Australia, Brazil, Canada, Denmark,  
France, Finland, Germany, India, Italy,  
Japan, Luxembourg, Norway, South Africa,  
Turkey, UK, UAE, U.S.A

## Current Activities, prioritised by the WG

- Fiber-reinforced sprayed concrete
- The document is now reduced to a shorter and precise document, with a solid list of references. Ready to be reviewed internally in the WG in very short time, then to be sent to ExCo 3<sup>rd</sup> Q of 2016.
- Sprayed concrete durability
- Paper will go to an internal review by the WG tomorrow, then to the ExCo in 3<sup>rd</sup> Q of 2016
- Quality control
- Have had internal discussions in Europe following WTC2015, persons are appointed for this task but no progress reported this year.
- Permanent sprayed concrete lining
- To be coordinated with ITA-Tech and submit to ExCo in 2<sup>nd</sup> Q 2017

## Other issues to work with in the WG

- Coordination and liaison with ITA-Tech

At this meeting we were lucky to have a representative from the ITA-Tech in the WG meeting which was really appreciated. A document from WG will be a joint document with ITA-Tech.

- Management plan of WG12

Management plan for WG12 has been further developed. The main purpose is to activate members, encourage them to take on tasks on behalf of ITA & allow them the credit when documents are presented.

- Communication architecture

Distribution is a challenge. A drop-box to serve for exchange of documents, but even more modern means on management system was discussed to improve communication internally.
