ADVANCED TECHNOLOGIES FOR TUNNELING

Strata Worldwide is a global company that drives system innovation and development. With 29 years of underground experience, the company is now taking a deliberate and strategic step forward within the tunneling industry to bring Strata's proven solutions to the global world of underground construction.

Strata offers advanced technologies in safety and communications, as well as a broad selection of specialty concretes, chemicals and injectable resins for countless applications and problem-solving solutions.

It's Strata Tunneling's mission to provide differentiated products and technologies that keep underground working environments both safe and productive.
