Trelleborg Marine & Infrastructure's polymer sealing and damping solutions are built on deep expertise and decades of craftsmanship. When it comes to Underground Construction and other high-performance special projects, the operational capability of our solutions is assured at the highest level, so our world keeps moving and working safely.

With over 20,000 employees and representation in 44 countries globally, we have unrivalled global reach, with feet-on-the-ground local presence, cross-industry expertise and in-house end-to-end solution capabilities, combining to improve integrity, sustainability and efficiency, and accelerate performance across projects.

Trelleborg strives to design, produce and deliver rubber products which are in accordance with the customers' requests, needs and expectations. This policy is based on the Trelleborg Group policy statement 'Code of Conduct'.
