With its guidance systems and services, **VMT** has been one of the leading suppliers in tunnel construction and industrial measurement for more than 25 years. Over 1,500 tunnel projects throughout the world bear witness to the efficiency and innovative strength of the **VMT** product portfolio in the fields of navigation technology, production and logistics management, deformation and process monitoring as well as data management.

*Navigation and supplementary systems*

*Modular production and logistics management system*

*Deformation monitoring system*

*Process data management system*

*Location and safety system*

*Industrial measurement solutions*

As a driving technological force, VMT has the experience, the capacities and the know-how to cope with the toughest project requirements.

Using innovative system and product solutions developed by VMT, construction companies build tunnels

and shafts of every size for ever more complex infrastructure projects: The navigation systems for driving equipment, the production and logistics management system for segment production and innovative system solutions for safety, information and monitoring all play key roles here. The individual modules can be combined into efficient, modern, net-worked solutions that ensure streamlined processes and seamless quality assurance for every tunnel project.

In industrial measurement, VMT develops concepts and supplies measurement equipment as well as services for manufacturing processes that have to meet the most stringent precision requirements.

Worldwide, the VMT Group employs about 270 members of staff ? at the headquarters in Bruchsal/ Germany, in its subsidiaries in Shanghai, Seattle, Melbourne and Saint Petersburg as well as in its representations in Singapore and New Delhi. VMT is part of the Herrenknecht Corporation, the global market leader in mechanical tunnel driving technology.
