Web site: www.rocksoil.com

Description: Established in 1979, Rocksoil S.p.A. quickly grew into a leading company in civil engineering design for underground works, special foundations and stabilisation where excavation and landslides make stability an important design factor. Rocksoil's design and construction procedures now constitute new standards both in Italy and abroad where they are used to update norms and specifications (e.g. ADECO-RS approach).

Provided services: Design, Technical Assistance on Site, Monitoring and Direction of Works in the geoenvironmental field for: underground works, foundations and retaining works, environmental recovery and repair.
