ArcelorMittal is a world leading manufacturer of steel fibres, providing safe, sustainable and cost effective solutions for the industrial, residential and civil construction markets.

As part of the ArcelorMittal Group, we are today the only fully vertically integrated manufacturer allowing us total control of our production processes, from steel billets to steel fibres. This enables us to guarantee complete quality and reliability to our customers.

ArcelorMittal Fibres are the first choice for your tunnel projects. Our impressive project reference portfolio includes Crossrail in London with >12,000t for Projects C510, C305 and C310; main supplier for Metro Doha/Qatar with a total >22,000t Red Line South, Red Line North and Golden Line; sole supplier for IDRIS project in Doha/Qatar, with ongoing deliveries for MTS01 with Bouygues, Urbacon, CSM Bessac JV.

The world is building on our strengths, build your projects on our strengths too.

ArcelorMittal Fibres, transforming reinforced concrete in pursuit of a better built world.
