Pr. Arnold Dix elected ITA President

Copenhagen – **Professor Arnold Dix has been elected as the new International Tunnelling and Underground Space Association President during the association's 48th General Assembly held today in Copenhagen. He succeeds Jenny (Jinxu) Yan from China. Arnold Dix is an Professor of engineering (Japan) , a scientist and a Lawyer**

New president Arnold Dix has been Vice-President of the ITA since 2019. He has been tutor of ITA COSUF and participated in two ITA working groups focusing on safety and maintenance in undergrounds works.

The ITA President's agenda for the next three years will follow the essential guidelines and theme of this year's congress main theme: sustainability in the underground industry. A strong advocate of measures taking into account climate change, he will continue the work initiated by Jenny Yan during her mandate and find ways for the industry to better implement ecoefficiency within the international tunnelling industry and communicate these social, economic and environmental advantages using modern language and concepts.

Arnold Dix provides expertise and special advice in multiple fields: legal, political, ethical and technical risks related to environment underground and complex structures.

" ITA is accelerating its response to the challenges of the climate emergency and sustainability through its publications, communications, teaching, product development and collaborative outreach programs. We are creating the world's first sustainability indexing tool especially for the underground, we are even creating a new type of contract. We are not just advocating the superiority of underground solutions to many of humanity's most pressing social, economic and environmental challenges – we are creating the legal and administrative tools, to make it happen in an even more sustainable manner " comments Arnold Dix.

Arnold Dix is an advisor for construction, including design concept review, commissioning, procedures and operational readiness with a special expertise on the underground, construction safety, operational safety, operations, environment, refurbishment and security.

Qualified as a counselor and a scientist, Arnold Dix is a lawman registered as Barrister of the High Court of Australia. His path led him to engineering and underground construction world with multiple subtopics such as environment, science, law, ethics, security, climatic changes and managing of disasters.

ITA-AITES 48th General Assembly also proceeded to elect its Executive Council:
